APPLICATION AND AGREEMENT FOR HARVESTING AND SALE OF  
CORN FODDER AND STOVER

INSTRUCTIONS TO STATE AND COUNTY DIRECTORS

1. The County Drought Director of each county that has been assigned a quota will be the Authorized Agent of the Government to sign the contracts.
2. The County Drought Director of each county shall send notices to all signers of applications for contracts notifying them that the contracts proper are ready for signature.
3. Contracts shall be numbered, using the same stamp of the Corn-Hog Association, starting alphabetically with A and numbering consecutively from one on down in each county. The Iowa state number would be 42, and Grundy county, for example, is 38 - thus the first contract signer in the A's would have the number 42-38-1. All reference to the contract shall contain both the name and number, so that if there should be two George Smiths in one county the number will be easier to use than the name.
4. The County Drought Directors shall hold all three copies of the contract until the last day on which the producers are permitted to sign, make a transmittal sheet and stamp on this sheet all contracts in alphabetical order at the end of this period. The producer's copy, FF 1B, will then be sent to the contract signer and the two others to the Waterloo office from which place the Washington copies, FF 1, will be forwarded to Washington. The number shall appear on each copy.
5. Each Drought Director shall make three copies of the transmittal sheet, one for his own files, one for the Waterloo office, and one for Washington headquarters, the original to be sent to Washington.
6. November 10, 1934 has been designated as the closing date for signing these agreements.
